Hele verden glæder sig over, at krigen i Aswana er slut, og at den lokale diktator er fjernet korporligt. Ikke mindst don Contralto, der er idømt 634 års fængsel (efter en uheldig misforståelse, naturligvis). For at udfylde de lange dage i sin celle i New York har mafiosoen nemlig kastet sig over arkæologiske studier og mener nu at have fundet ud af, hvor Alexander den Stores forsvundne skat befinder sig – i en underjordisk labyrint midt i Aswana! Mon ikke han kan få sin nevø don Vito Cortizone til at overtale et par eventyrere til at finde den uvurderlige skat i det krigshærgede land? Snart befinder Splint og Kvik sig i Aswana, der trods krigens officielle afslutning ikke nødvendigvis er et fredeligt sted. Og hvor der ud over en gammel bekendt venter dem en række udfordrende gåder, som skal løses. Heldigvis har de radiokontakt med grev Champignac – og Spip med sig!
